Jetpur Silk Roots

Connecting Traditional Silk Manufacturers with Global Markets

Meet the Project Team

Digital Innovation

Bridging centuries-old craftsmanship with modern technology to create global opportunities

Course Excellence

Demonstrating advanced marketplace development and cultural intelligence systems

Real Impact

Creating measurable value for traditional artisans in the digital economy

The Challenge: Traditional Silk Industry Barriers

Digital Divide

- Traditional silk manufacturers lack digital presence

- Complex export processes create barriers

- Limited access to global markets despite premium quality

Communication Gaps

- Language barriers in international trade

- Manual processes causing delays and inefficiencies

- Lost opportunities for skilled artisans

Impact: Reduced opportunities for artisans and lost global market access worth millions in potential revenue

Our Solution: Jetpur Silk Roots Platform

Digital Marketplace

Comprehensive platform connecting traditional silk manufacturers with global customers through intelligent matching

Direct Connections

Eliminates intermediaries, enabling direct communication between manufacturers and international buyers

Multi-Language Support

Easy-to-use interface with intelligent language switching for English, Hindi, and Gujarati

Export Automation

Automated export assistance streamlines international trade documentation and shipping processes

Key Features: What Makes Us Different

1

Smart Manufacturer Verification

Builds trust through comprehensive verification profiles, authenticity certificates, and quality ratings from previous customers
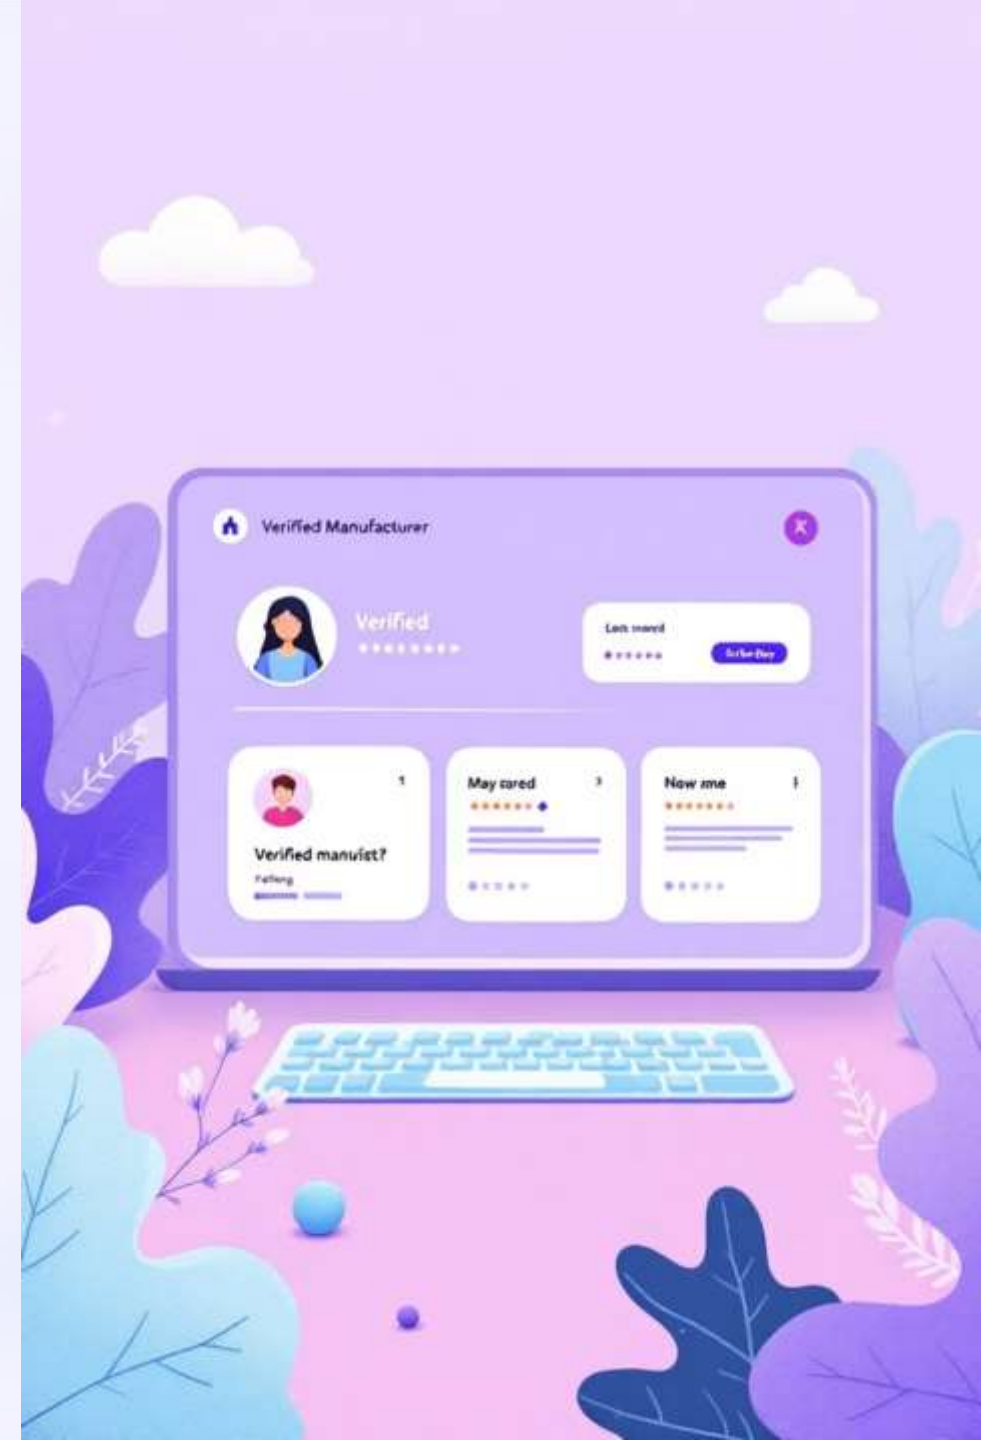

2

Cultural Intelligence Engine

Automatically adapts to regional business customs, switches languages contextually, and displays local pricing with currency conversion

3

Streamlined Inquiry Process

Simple contact forms with instant manufacturer notifications, integrated export assistance, and shipping coordination for international orders

Technical Foundation: Modern Web Architecture

Technology Stack

- **Frontend:** React with TypeScript for robust, type-safe interface development

- **Backend:** Supabase providing secure, scalable data management

- **Deployment:** Vercel ensuring global performance and reliability

- **Design:** Mobile-responsive with modern UI/UX principles

Performance Achievements

- ⚡ 1.8 seconds average page load

- 📱 100% mobile optimization

- 🌐 Global CDN coverage

> 🗩 **Industry Benchmark:** Our 1.8-second load time significantly outperforms the 3-5 second industry standard

Results & Impact: Measurable Success

99.95%

Platform Uptime

Reliable service ensuring consistent access for manufacturers and buyers worldwide

95/100

Performance Score

Superior technical performance validated through comprehensive testing
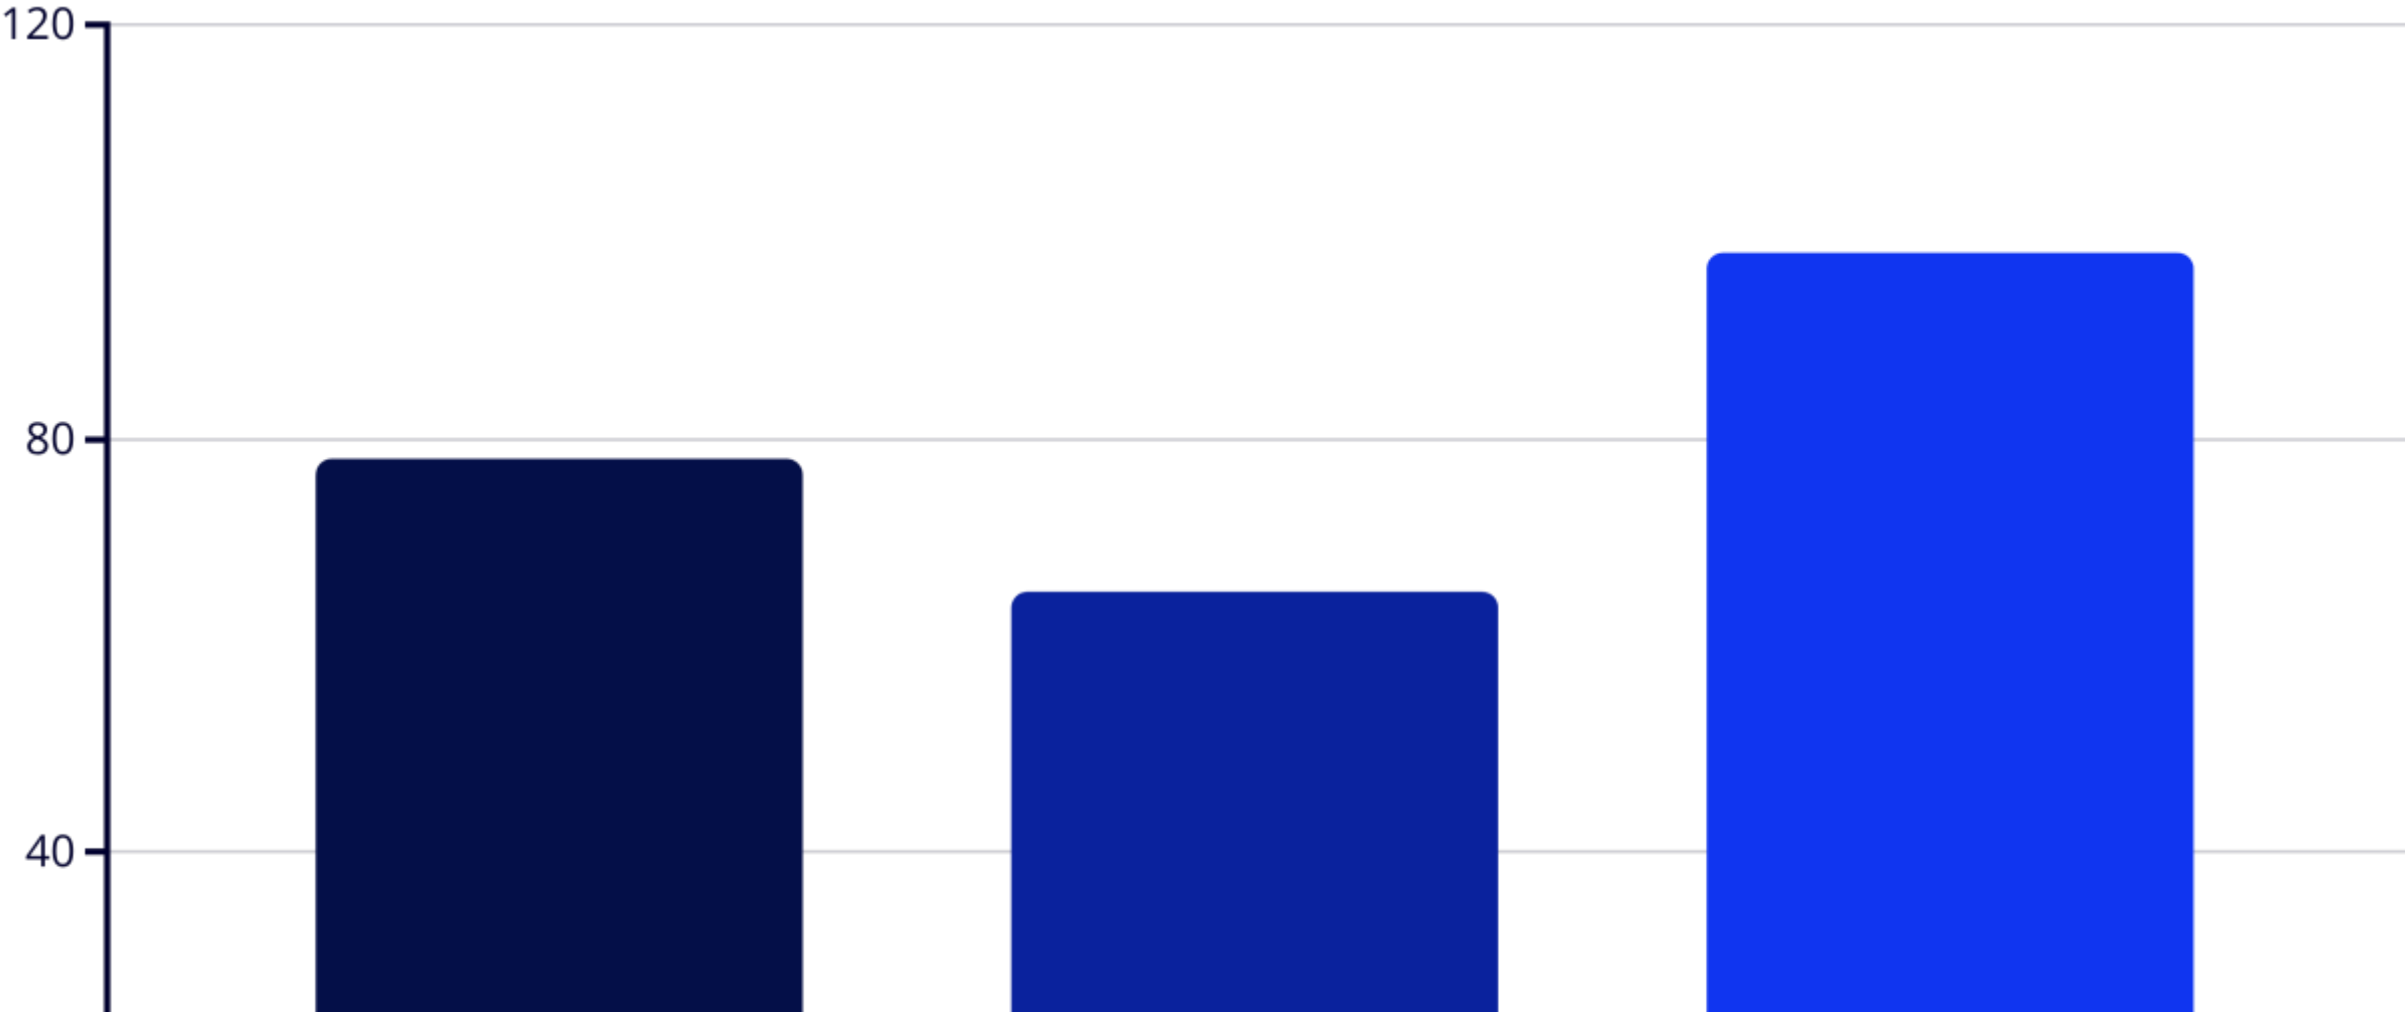

200+

Monthly Inquiries

Active marketplace generating consistent business opportunities

4.4/5.0

User Satisfaction

High satisfaction rating from both manufacturers and international buyers

Innovation Highlights: Industry Differentiation

1 Community-Focused Approach

Unlike transaction-focused platforms like Amazon Handmade, we build lasting relationships between artisans and buyers

2 Cultural Intelligence

Advanced AI-driven cultural adaptation goes beyond simple translation to understand regional business customs

3 Integrated Export Solutions

Built-in export assistance eliminates the need for external tools, streamlining international trade

Industry First: The only platform designed specifically for traditional silk industry with authentic cultural preservation

Live Platform Demonstration

01
Multi-Language Homepage

Intelligent interface automatically detects user preferences and adapts language, currency, and cultural elements

02
Product Discovery

Advanced filtering and search capabilities help buyers find exactly what they need from verified manufacturers

03
Verified Profiles

Comprehensive manufacturer information including certifications, customer reviews, and production capabilities

04
Seamless Communication

Streamlined inquiry forms with automatic translation and instant notification systems

05
Export Assistance

Integrated shipping coordination and documentation support for international orders
